

Preparing students for the global economy

NEW

Health Science and Human Services

HSHS Academy courses are designed to prepare students to pursue a post-secondary education and careers in STEM (Science, Technology, Engineering and Math), related fields.

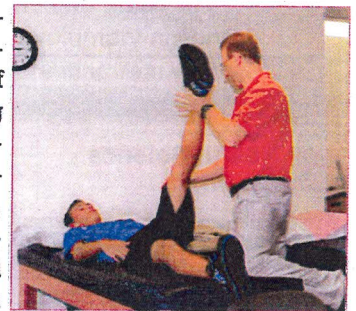

Be a part of exciting career opportunities in Health Sciences and Human Services!

According to the Bureau of Labor Statistics:

- Health Science will be the fastest growing career cluster over the next decade.
- By 2020, employment in Health Science occupations is projected to grow from 12 million to over 15 million.
- 3.5 million new jobs will be introduced.

The goal of CCHS Health Science and Human Services Academy is to offer a program of study that provides an overview of the many facets of the ever-emerging medical science field of technology. Students will be able to move from an introduction to the health care delivery system, its services, and wide variety of occupations, to a more specific career focus and specialization in the upper grade levels. In our Health Science and Human Services Academy students will learn:

- The planning, managing, and providing of diagnostic and therapeutic services,
- health informatics,
- support services and
- biotechnology research and development.
